

DR. SUMIT BANSAL

Consultant - Urology

Qualification

M.Ch (Urology) | M.S (General Surgery) | FAGE | MBBS

Overview

Dr. Sumit Bansal is a well-known urology specialist in Delhi. He completed his super specialization in Urology & Renal transplantation from the prestigious Sion Municipal Medical College, Mumbai (LTMMC & LTMGH) which is among the highest volume centres in the country. Dr. Bansal received an honorary F.A.G.E. in 2013. He was awarded the Robotic Surgeons' Council of India scholarship in 2017. He further pursued short fellowship courses in advanced endourology, andrology, reconstructive urology and female urology from renowned ceMAST, Mumbai. He was instrumental in taking the department to new heights. Dr. Bansal is amongst the very few urologists doing laparoscopic donor nephrectomy for living donor kidney transplants. He has successfully operated over 500 kidney transplants with more than 95% results. He is proficient with laser/minimally invasive management of urological stones, prostate disorders, urological cancers (including Robotic surgeries), urethral strictures, male sexual disorders and infertility. He has multiple national and international publications and has also authored textbook chapters.

Field of Expertise

- Endourology Ureteroscopy, Flexible ureterorenoscopy(RIRS), TURP, TURBT, HoLEP, PCNL, Mini-PCNL (practically any procedure possible with a urological endoscope and laser)
- Renal Transplant Laparoscopic donor nephrectomy including complex vascular anatomy, recipient surgery, and vascular access for hemodialysis
- Uro-oncology Radical cystectomy, Radical prostatectomy, Radical nephrectomy, Adrenalectomy, surgical management of penile and testicular cancer
- Laparoscopic and minimal access urology Radical and partial nephrectomy, Pyeloplasty, ureteric reimplant, Radical prostatectomy, Radical cystectomy
- Reconstructive urology Urethroplasty, Pyeloplasty, Penile implant, testicular implant
- Paediatric urology Management of vesicoureteric reflux disease (ureteric reimplant, deflux injection) hypospadias correction, pyeloplasty, posterior urethral valve ablation
