

DR. KARTHIK RAGHURAM

Consultant - Cardiology

Qualification

MBBS | MD General Medicine | DM Cardiology

Overview

Being a dedicated and compassionate cardiologist in the fraternity, Dr. Karthik Raghuram is one of the top consultant cardiologists practising in the interventional cardiology department. Backed by extensive education and training in interventional cardiology, Dr. Karthik is eminent for treating a wide range of cardiovascular diseases, from common to complex cases, including congenital, structural heart disorders, and more. Interventional Cardiology is a prestigious speciality he possesses, which treats heart and blood vessel conditions with the help of catheters. This speciality is highly appreciated in the medical world as it may suppress the need for complicated surgeries like open-heart surgery. Dr. Karthik's care and understanding towards the patients are commendable, which assisted in solving highly complex cases promptly. Dr. Karthik is currently dedicated to serving at Manipal Hospitals, Jayanagar, Bangalore, as a Cardiology Consultant backed with years of medical experience in his field. The respected degrees of Dr. Karthik range from MBBS to Doctor of Medicine (MD) in general medicine and Doctorate of Medicine (DM) in Cardiology. Dr. Karthik holds a revered fellowship and membership in the Coronary and Structural Interventions group in Interventional Cardiology. He can reach, comprehend, and cure the health conditions and disorders of various patients coming from diversified backgrounds, thanks to his trilingual skills in English, Kannada, and Hindi. For the same reason, he has become a famous cardiologist in Bangalore. Dr. Karthik's talks and publications received huge recognition among his peers and the medical fraternity. Especially the publications that appeared in the National Medical Journal of India, a high-quality and notable publication of the AIIMS, are unparalleled. These outstanding publications reflect the contributions made by Dr. Karthik on a social welfare level and the commitment he possesses as a proud medical practitioner. Some of his noteworthy publications include the study on managing a complicated pacemaker pocket site infection, the story of a tired heart featuring the case of Tachycardiomyopathy which was handled by fortunate ablation of right ventricular outflow tract mid septum premature ventricular complexes, a study on Atrial Arrhythmias following surgical or technological closure of the atrial septal defect, study on clinical profile and results of semi-permanent pacing at a tertiary care institute in southern India and more. Dr. Karthik has spoken on the technical challenges in transcatheter aortic valve replacement with balloon-expandable prosthesis and Starr Edward prosthesis in the mitral position. He is also acclaimed for his extensive research and studies on various in-demand topics affecting people's health at a societal level, such as the commonness of depression in the community-dwelling elderly population, a study from the Indian rural population. It is truly exceptional to witness current medical practitioners like Dr. Karthik assisting a vast patient base with ease, thanks to his qualifications, skills, expertise, and perseverance that contributed to benefitting society manifold.
