

DR. CHITRA SANKAR

Consultant - Pediatrics Neurodevelopment

Qualification

MBBS | DCH (London) | MRCP (Paediatrics)

Overview

Dr. Chitra Sankar is a Consultant - Paediatrics at Manipal Hospitals, in Sarjapur Road, Bengaluru. Her areas of competence and talent include evaluating young children's development, particularly those from 1 day old to 3 years old. She has experience diagnosing and treating kids with developmental disorders such as cerebral palsy, conditions on the autism spectrum, learning difficulties, and attention deficit hyperactivity disorder. She is a specialist in developing early intervention programs for various problems. She also specialises in developmental follow-up clinics and neurodevelopmental follow-up of preterm infants. The doctor has obtained certification in using the developmental assessment scale for babies from India. She has received training in administering the gold-standard diagnostic tools for autism spectrum disorders, the autism diagnostic interview, and the autism diagnostic observation schedule. She is gathering information on the neurodevelopmental outcomes of VLBW and preterm infants in the Indian Scenario. She is knowledgeable about early intention programs, community-based and hospital-based developmental clinics, and developmental screening procedures. She has memberships in several respectable medical organisations such as the Bangalore Paediatric Society (BPS), the childhood disability group, the Indian Association of Paediatrics (IAP), and the IAP Growth and Development chapter. Additionally, she has been featured in numerous newspapers, including South First, Asianet News, and Times Now News.
